

Genesis™ Pallet

Reusable Plastic Pallets.

Lighter. Smarter.
Circular by Design.

Circularity Made Simple.

The Viscount Difference

Locally manufactured in Australia, **Genesis™** reusable plastic pallets are engineered for high-performance supply chains that demand strength, consistency and automation compatibility. Designed as an alternative to pooled wooden pallets, **Genesis™** offers a cost-effective pooling and purchasing solution that improves safety, operational efficiency and sustainability. Built for long-term reuse, with Track & Trace technology, **Genesis™** helps progressive businesses move towards smarter, more efficient logistics systems.

Approximately 50% lighter than traditional wooden pallets at just 23kg.

Designed for high-performance automated distribution centres and ASRS/AGV systems.

Built-in tracking technology for instant shipment confirmation and enhanced equipment control.

Drive-in and drive-through racking rated for operational flexibility.

Available in both vented and solid top deck options.

Eliminates double stacking, reducing product damage, pallet jamming and rejected loads.

Manufactured locally in Australia.

Fully recyclable at end of life, with materials re-ground and reused.

Achieve Your Sustainability Targets

For businesses transitioning from traditional wooden pallets to Genesis™, the benefits include:

- Reduced transport related scope 3 emissions, through lighter pallet weights and reverse logistics model.
- Designed for long term durability, reuse and recyclability.
- Reduced product wastage / spoilage caused by nails and wood splinters.
- Improved workplace safety and handling efficiencies.
- Reduced timber consumption across supply chains.

Purchase & Pooling available

Whether you are purchasing to own or pooling, we've got you covered. **Genesis™** pallets are available across flexible commercial models designed to support modern supply chains.

Our Impact

At Viscount, performance is measured in real outcomes - for your business and for the environment. Genesis™ has been designed to support the next generation of circular supply chains through smarter material handling, automation compatibility and reusable infrastructure.

Every Genesis™ pallet delivers:

- Reduced reliance on timber-based pallet systems
- Improved operational efficiency across automated warehousing environments
- Enhanced food safety and hygiene performance vs wooden pallets
- Long-term circularity through reuse, recovery and recycling

Key Features

- SRS/AGV compatible with moulded window geometry for automated handling
- Food safety compliant non-porous surface
- Consistent dimensions for reliable high-speed automation
- Specifically designed beam racking cut-outs
- Trackable, recyclable and reusable
- Unique RFID-enabled pooling model in the Australian market

Product Details

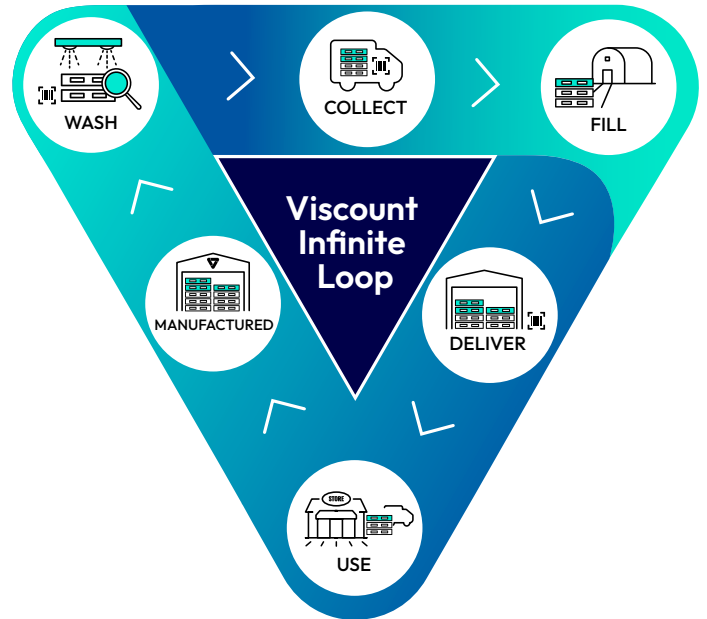

- 1165mm x 1165mm x 150mm footprint
- ~1200kg+ edge racking load rating
- Estimated +/- 20mm deflection
- 6 x strengthening rods per pallet with custom reinforcement options available
- Barcodes featured on two sides
- Optional Track & Trace hardware included
- Manufactured as per ISO9001
- HDPE plastic
- Non-slip grommets and upstands improve product stability and forklift tine friction
- Ergonomically placed hand holds & lighter weight for safer manual handling

Better for Business.
Better for the Environment.

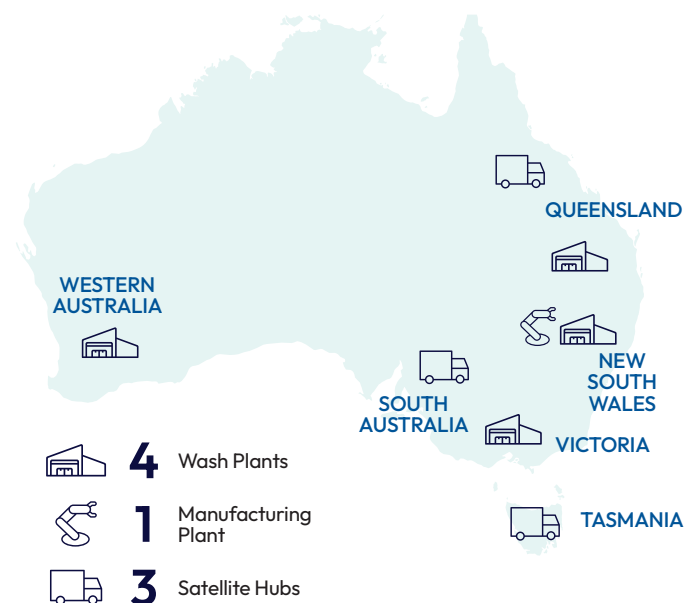

Pooling vs Purchase - Join The Infinite Loop

Genesis™ creates a new era of product transportation for businesses seeking automation reliability, safety, hygiene and operational performance. Designed specifically for modern warehousing and intralogistics environments, Genesis™ removes the inconsistencies associated with traditional wooden pallets while supporting circular supply chain outcomes.

Viscount's national pooling network provides washing, inspection and redistribution services, ensuring pallets arrive ready to use without the burden of cleaning, storage or disposal management.

The Infinite Loop delivers clear benefits across the supply chain: Cost Savings | Lower Emissions | Operational Efficiencies | Improved Safety
