

Nally Folding MegaBin®

A new solution for your reuseable folding bin needs.

Circularity Made Simple

Smarter Bulk Handling

The **Nally Folding MegaBin®** is the only pooled bin in Australia capable of stacking six high when fully loaded, improving storage density optimised for transport efficiency. With a 550kg load capacity, it enables more product per pallet and truckload while reducing handling and labour. Each bin is RFID-enabled as standard, delivering asset visibility whilst Viscount's optional Genius Tag™ provides advanced Track & Trace technology. Its 3:1 folding design reduces reverse logistics costs, while durable, hygienic construction supports demanding fresh food supply chains.

Available in 3 options with the ability to manufacture to your specific needs.

Only pooled bin stacking six high fully loaded, with a 550kg load capacity.

RFID-enabled traceability with optional temperature and handling alerts.

3:1 folding collapse ratio, folds down to 280mm.

Smooth interiors reduce debris, resist bacteria and support food safety standards.

Automation-ready for tipping, washing, conveyors and racking.

Eliminates timber & single-use packaging; fully recyclable for zero-waste circular outcomes.

Australian made and UV stabilised for durability in harsh local conditions.

More Product. Less Handling. Smarter Reuse

The Folding MegaBin® improves transport efficiency, reduces handling and storage costs, and provides full asset visibility through RFID tracking — all within Viscount's managed reusable pooling system.

Purchase & Pooling available

Whether you are purchasing to own or pooling, we've got you covered. All three sizes are available to purchase or pool, contact us today to make the switch.

Pooling vs Purchase – Join The Infinite Loop

A World Without Single Use

Viscount operates nationally, with washing, inspection and redistribution facilities designed to support high-volume, high-frequency logistics. Assets arrive ready to use, removing the need for customers to manage cleaning, storage or disposal. This frictionless model allows businesses to transition away from single-use without disrupting operations. Circularity becomes practical, scalable and commercially smart – not a burden.

The Infinite Loop delivers clear benefits across the supply chain:

Cost Savings | Waste Elimination | Lower Emissions | Operational Efficiencies

**Better for Business.
Better for the Environment.**
